Erratum

In the article entitled "A Dirty Dozen: Twelve P-Value Misconceptions," by Steven Goodman (Semin Hematol 45:135–140, 2008), the correct equation for Bayes' theorem on page 139 is:

$$\text{Posterior Odds } (H_0, \text{ given the data})$$
$$= \text{Prior Odds } (H_0) \times \text{Prob (Data, under } H_0)/$$
$$\text{Prob (Data, under } H_A).$$
